## **TILT WALL MAN**

Barnsco provides accurate and informative tiltwall panel detailing services and quality tiltwall man products to customers designing and building tiltwall panel construction projects.

Barnsco personnel are qualified and experienced in the erection of tiltwall panels. We have over 25 years of tiltwall panel erection design experience.

Barnsco believes that communication and information are the most profitable “tools” on any construction project.

Barnsco’s computer analysis software and experienced personnel use proven techniques to minimize the tiltwall panel lifting stresses: keeping erection inserts, added reinforcement, and temporary bracing to a minimum: insuring that tiltwall panels are lifted safely and efficiently.

Barnsco provides computer generated tiltwall panel drawings that provides all tiltwall panel dimensions and lifting – bracing information: All steel embed information (Locations – Quantity – Marks – Type) Paper doll casting bed plan and tiltwall panel elevations: Accurate and detailed list of materials and equipment: All in an easy read format (8 ½ X 11 Sheets, 11 X 17 Sheets or 36 X 42 Sheets)

These are the “Tools” that give the contractor and subcontractor accurate, informative, pre-planning communication and information that allows them to conduct an efficient, productive, safe and successful tiltwall panel operation.

**Barnsco provides detailing services and tiltwall man products to customers in Texas, California, Florida, Georgia, Arizona, Mississippi, Washington, Oregon, North and South Carolina, Virginia and more.**

**Barnsco has ready for delivery: Tiltwall panel bond breakers, pipe braces, panel lift hardware, lift brace inserts wood reveal, wood chamfer, and reinforcing steel.**
